VOYAGER &
GRAND ODYSSEY CLOCK

VOYAGER & GRAND ODYSSEY CLOCK

The original and most popular of our travel alarm clocks, the Voyager is a Dalvey classic, used worldwide - the perfect travel companion.

The stunning Grand Odyssey Clock is a striking design that offers a rich, substantial presence through its intricately textured face, deep-engraved detailing, exceptionally crafted badge and ergonomic engineering.

Precision engineered from high quality stainless steel, the Voyager & Grand Odyssey Clocks are hand polished to a mirror finish. Its lustre will not fade, and is easily maintained by buffing with a soft cloth.

- **(Fig.i)** Place the case, badge upwards, on the flat of your hand. Bracing the tips of the forefinger and thumb of your other hand against the lower half of the case, pinch and pull the spring-loaded pommel. The pommel will move away from the case, thus releasing the catch, and allowing the lid to open.

(Fig.i)

- Secure the clock in its upright position by inserting the locator on the bottom of the clock movement into the locating recess in the lower case.

INSTRUCTIONS FOR USE

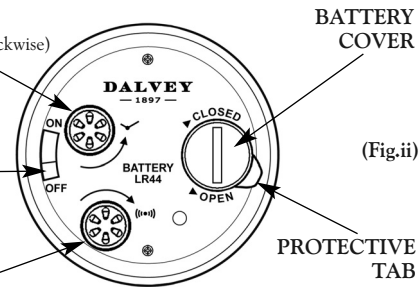

TIME SET

(turn anti-clockwise)

ALARM ON/OFF

ALARM TIME SET

(tolerance +5 or -5 minutes turn clockwise)

(Fig.ii)

- **(Fig.ii)** Open the battery cover on the back and remove the small protective tab from the battery (Battery LR44). The controls for setting the time and alarm are also found here. The time set control knob should be adjusted in an anti-clockwise rotation only, and the alarm time set control knob in a clockwise rotation only.
